SMART**HOOKS**

Removable hooks that don't damage your walls

New from Select Hardware – the Wall Gard range of self-adhesive Smart Hooks, easy to use re-usable hooks designed not to damage or impact on walls. Ideal for student halls, rental homes, caravans and other areas where walls need to be kept free from damage caused by nails or screws.

All Smart Hooks feature a heavy-duty adhesive that creates a strong bond to the wall and is ideal for hanging or storing items around the home and office.

Need to remove? No problem

Once the hooks are not required they can be removed by simply stretching off the adhesive – leaving the wall undamaged, with no unsightly holes or marks that are left when using nails or screws.

Use again and again

Wall Gard Smart Hooks come with aditional adhesive strips*, allowing them to be removed and used again and again.

Perfect for retail

It's not just the hooks that are smart - Wall Gard Smart Hooks packaging is colourful and modern, with colour images front and back and thorough user instructions and guides. Each range has its own colour banding to help both retailer and consumer identify product usage and allow effective merchandising.

* does not apply to Hook & Loop packs
